R. Griffiths 30 Sept 1840
entire works

I regret I did not know more
of your plan but nothing
could be done in the hurry of
the occasion the meeting should
convince the country &
you will remember that
I shall be always happy to
serve you.

I am dear Mr Milne
very truly yours
Richard Griffith

2. Ebrington Place Dublin
Sept. 30. 1840

My dear Mr. Milne

I have had the pleasure to
receive your letter of the 27 Inst.
but not the newspaper containing
the notice of the Earthquake.—
Probably it may reach me tomorrow
I shall be happy to collect information
on the subject.—

The Geological maps of Ireland are
to be published from Hodges &
Smiths Dublin price 2. 5 for the
set. Hats coloured but do not include fos

than till I have completed my
new edition What I shall do
in a month from this time
there are Local details which only
what I can at present collect by
information & Shentus of my
friends this fuld for the purpose
the points in question are
important & I should be sorry
that the Shetland Society should
not have a work as perfect as
I can make it — —

I think there have been some
DSI

publications with the transactions
of the Wernian Society of
Edinburgh containing figures of
some Mountain Limestone
fossils if there be such you have
the goodness to let me know
the titles that I may procure
them.

I wish the Geological Society
in the transactions of the Shetland
Society were printed separately
for the use of Geologists as many
of them are poor & they
can't get the Volume of the
